Twenty ton weight limit posted for WIS 130 bridge, Lone Rock

Maximum weight limits for vehicles using the WIS 130 bridge over the Wisconsin River south of Lone Rock have been temporarily reduced to 20 tons. The reduction (from 40 tons) is a precautionary measure after a routine inspection showed structural damage caused by a crash.

Trucks and vehicles exceeding the 20 ton limit can utilize bridges at US 14, WIS 23, or WIS 80.

Automobiles are permitted.

Bridge repairs are expected to take up to eight weeks.
