

Iowa County COVID-19 Disease Control Metrics

Data from 12/16-12/29		Measure	Iowa County threshold metrics	Iowa County Status
Epidemiology	Cases	Less than 5% of tests in Iowa County are positive when averaged across a 14- day period	Green: Below 5% positivity Yellow: ≥ 5-10% positivity Red: Above 10% positivity	8.6%
	Cases	New cases below a threshold of .5 per day averaged over 14 days	Green: Below .5 cases per day averaged over a 14-day period Yellow: .5-2 cases per day averaged over a 14-day period Red: Greater than 2 cases per day averaged a recent 14-day period	11.14
	Outbreaks	Outbreaks are identified and managed	Green: No active outbreaks Yellow: One active outbreak in a facility or employer with under 50 employees/ residents Red: Two or more active outbreaks OR one active outbreak in a facility or employer with over 50 employees/residents	
Healthcare	Testing	Testing supplies and staff facilitate adequate testing for disease control and surveillance	Green: 35+ tests are performed per day, on average, in the past two weeks Yellow: 24-34 tests are performed per day, on average, in the past two weeks Red: <24 tests are performed per day, on average, in the past two weeks	130
	Healthcare Infrastructure	Upland Hills Hospital is able to handle all cases without crisis care	Facility use status: Med surg and ICU census	
			Staffing status: Trained staff are available or able to adequately care for the volume of patients even with extension techniques. Critical supply status: There are at least 14 days worth of critical supplies.	
Public health	Regional Healthcare Infrastructure	Regional hospital bed use	Green: <80% bed use Yellow: between 80-90% bed use Red: Greater than 90% bed use	76.5%
	Contact tracing and lab reporting timeliness	All positive cases are reported and contacted quickly to facilitate rapid isolation and quarantine for disease control	Green: Greater than 85% of all new cases are contacted within 48 hours of results becoming available Yellow: 70-85% of all new cases are contacted within 48 hours of results becoming available Red: Less than 70% of all new cases are contacted within 48 hours of results becoming available	94%
	Community spread	Community spread is and limited identified	Green: Fewer than 20% of cases in the past two weeks do not have a known route of transmission Red: 20+% of cases in the past two weeks do not have a known route of transmission	40%
EM	Health Department	Iowa County Health Department has adequate staffing to handle day to day operations.	Health Department answers yes to the following: Case Volume: Staff are able to manage health department operations. Staffing status: Staff are available to perform health department operations.	
	Isolation capacity	Capacity for supporting isolation and quarantine when appropriate	Green: Isolation and quarantine support resources are available Red: Isolation needs are not able to be met	
	Emergency management	Iowa County Emergency Management has adequate supplies and functional day to day operations	Green: Iowa County Emergency Management is in agreement that adequate pandemic-related supplies are available and day to day operations are routine or non-critical Red: Iowa County Emergency Management is lacking pandemic-related supplies or is attending to crises, disasters or other critical matters	

Iowa County COVID-19 Disease Control Metrics

What's new this week?

Epidemiology: Our percentage of positive cases decreased slightly, now at 8.6%, remaining yellow. The average cases reported daily metric decreased slightly to 11.1, remaining in the red. The Outbreak metric remains red.

Healthcare Status: Testing rate remains green with an average of 130 tests performed daily. We encourage anyone with symptoms to contact his/her health care provider to be tested. Local health care partner's facility use status (represents med surge and ICU capacity) remains yellow. Staffing status indicates the number of available staff to care for the volume of patients and remains yellow. Critical supply status reflects at least fourteen days worth of supplies. This metric remains green. Our regional health care infrastructure metric represents regional hospital bed use and has changed to green. Currently there are 76.5% of regional hospital beds in use, down from last week. In addition, 75.6% of total regional ICU beds are in use, also down from last week.

Public Health Status: Community spread increased some and remains in red, as 44% of cases are reporting no known source of transmission in the past two weeks. Our goal is that fewer than 20% of cases have no known source of transmission. This value is a reflection of current information, some data is missing, as not all cases have been in contact with the health department. Our contact tracing efforts are at 94%. This metric is dependent on individuals either answering the phone or returning our calls, which remains an issue. Our health department volume and staffing metric remains yellow.

Emergency Management: Our emergency management partners remains green. PPE demand continues to be up and the supply chain is experiencing issues with gloves, gowns and N95 masks.
