Iowa County Health Department

Director/Health Officer

Debbie Siegenthaler RN, MSN

Case Count Increases Over Weekend to 370; Weekly Dashboard Check-in; Lafayette County Test Site 10.20.20

Iowa County – The Health Department confirms over the weekend we added 19 additional cases bringing the current COVID-19 confirmed case count in Iowa County to 370. The recent cases are in persons in the following age ranges: 0-17 (4), 18-25 (2), 26-35 (3), 46-55 (2), 56-65 (6), 66-75 (1) and 76-85 (1). The number of individuals that have recovered is 251, meaning 119 cases are active. The Health Department contacts all positive cases. Due to the volume of cases, the Health Department is experiencing delays in the time frame in which we are able to reach out to close contacts.

The Iowa County dashboard is showing continued upward trends in metrics. The average number of new daily cases rose to 11.58, up from an average of 8.21 last Monday and 5.57 the Monday prior. Cases are in all age ranges and across the entire county. The number of active outbreaks is fourteen and occurring in Mineral Point (6), Dodgeville (6), Barneveld (1) and Highland (1). The Health Department will not list the names of businesses, organizations or events with outbreaks due to privacy concerns.

“Avoiding a large surge in our hospitals and our public health and emergency response systems continues as the priority. Local public health departments have reached or exceeded capacity in several counties, which hinders meaningful contact tracing. This is the case also in Iowa County and our metric, added last week, remains yellow,” states Debbie Siegenthaler, Director, Iowa Co Health Department.

Parts of Wisconsin are experiencing increases in hospital admissions and staffing concerns. This is the case in southern Wisconsin as well. Our local hospital is doing ok but are closely monitoring capacity and critical supplies. Staffing is beginning to become strained. Locally, we are also very interested in the capacity of Dane County hospitals as we transfer critical patients in some instances. Our region is experiencing hospital bed usage at 85% and ICU bed usage at 86% and the usage of both is trending upward <https://www.dhs.wisconsin.gov/covid-19/disease.htm> This data dashboard also details COVID-19 disease activity which Iowa County status is classified as VERY HIGH activity level.

“The message continues to be very straight forward... YOU stop the spread, so be part of the solution! Don’t go to crowds and don’t create crowds. Mask up, keep your small social circles outside, practice social distancing and wash your hands often. Every person and every practice is important and helps us and the entire community with our goals”, Siegenthaler added. A vital message to residents who are high risk (60 years and older or have a chronic medical condition or compromised immune status)... please take extra precautions to reduce your exposure.

Iowa County Dashboard Metrics: *Weekly check-in...*

Epidemiology: We continue to see an increase in positive cases, moving the metric up to 7.5%, this metric remains in the yellow. The average cases reported daily metric continues to increase, now at 11.58, keeping this metric red. The Outbreak metric remains red, now with fourteen active outbreaks in Iowa County.

Healthcare Status: Testing rate remains green with another increase in number of tests performed daily, now averaging 153.8. We continue to encourage anyone with symptoms to contact his/her health care provider to be tested. Our partners in health care remain in green status but staffing capacity is being closely monitored along with critical supplies.

Public Health Status: Community spread decreased some, but still in red as 41% of cases are reporting no known source in the past two weeks. Our goal is that fewer than 20% of cases have no known source of transmission. This value is a reflection of current information, some data is missing as not all cases have been in contact with the health department. Our contact tracing efforts remain successful, as 96% of positives cases in the past two weeks have been successfully contacted within 48 hours of their positive tests. This metric is dependent on individuals either answering the phone or returning our calls, which is becoming an issue. We've added an additional metric indicating the ability and availability of the health department to manage daily operations. With the continued increase in cases, this metric is yellow.

Emergency Management: Our emergency management partners remain in green status; however, PPE demand has picked up and the supply chain is experiencing issues with gloves, gowns and N95 masks.

Note: metrics are reflective of data between 10/5-10/16 due to WEDSS outage over the weekend

School Capacity Indicator Dashboard <https://www.iowacounty.org/COVID-19IowaCountySchoolGuidance>

This dashboard is updated each Monday and contains key dashboard metrics from our Iowa County COVID-19 Dashboard with the addition of the new case rate in the past two weeks. This week, the new case rate is 58.5 per 10,000, another increase from last week's value, 48.8 and 32.8 the week prior. Also included is a breakdown of cases among school age children, which is continuing in an upward trajectory.

Below are changes in key areas of our local dashboard since mid-July.

<i>Date dashboard was updated</i>	<i>Percent of tests that are positive</i>	<i>Average number of cases reported per day</i>	<i>Average number of tests per day</i>	<i>Outbreaks metric</i>	<i>Percentage of cases contracted by community spread</i>
July 20	1.45%	.92	42.8	Red	46%
July 27	2.1%	.71	33.1	Red	30%
August 3	2.6%	1.0	37.7	Red	42%
August 10	3.9%	1.71	43.6	Red	38%
August 17	4.2%	2.5	60	Red	54%
August 24	3.8%	2.0	53	Red	46%
August 31	3.3%	1.5	45	Red	43%
September 8	2.0%	0.93	45.4	Red	38%
September 14	1.3%	0.64	49.7	Red	40%
September 21	2.6%	1.79	70	Red	64%
September 28	3.5%	3.79	107.5	Red	60%
October 5	4.8%	5.57	116.5	Red	51%
October 12	6.8%	8.21	121	Red	43%
October 19	7.5%	11.58	153.8	Red	41%

Lafayette County Test Site 10.20.20

The Health Departments of Iowa and Lafayette County have partnered to provide a Covid-19 Community test site in our counties. **Tomorrow, Tuesday, October 20, the test site will be in Iowa County from 10 am to Noon at the Health and Human Services Center located at 303 West Chapel Street in Dodgeville.** Next week, October 27 the Lafayette County Test site will be held from 10:00am – 12:00pm at the Lafayette County Ames Road Multipurpose Building at 11974 Ames Road in Darlington.

Testing is free and open to anyone (age 5+) who feels they have a need to be tested. Minors must be accompanied by a parent or guardian with consent. Appointments are not required, but it is requested that those who wish to be tested pre-register at <https://register.covidconnect.wi.gov>.

People should consider visiting the testing site if:

- * They have had close contact with someone who tested positive for COVID-19.
- * They have COVID-19 symptoms
- * They have regular exposure to a large number of people (i.e., people who work in grocery stores)
- * They work closely with high-risk populations (i.e., healthcare workers, people who work with people who are incarcerated, people who work in long-term care facilities)

Upland Hills Hospital will continue to provide COVID testing as they have since the pandemic began. Please see the Upland Hills website for information on getting tested at their facility.
