

Iowa County COVID-19 Disease Control Metrics

	Data from 10/7-10/20	Measure	Iowa County threshold metrics	Iowa County Status
Epidemiology	Cases	Less than 5% of tests in Iowa County are positive when averaged across a 14-day period	Green: Below 5% positivity Yellow: ≥ 5-10% positivity Red: Above 10% positivity	7.9%
	Cases	New cases below a threshold of .5 per day averaged over 14 days	Green: Below .5 cases per day averaged over a 14-day period Yellow: .5-2 cases per day averaged over a 14-day period Red: Greater than 2 cases per day averaged a recent 14-day period	11.35
	Outbreaks	Outbreaks are identified and managed	Green: No active outbreaks Yellow: One active outbreak in a facility or employer with under 50 employees/residents Red: Two or more active outbreaks OR one active outbreak in a facility or employer with over 50 employees/residents	14
Healthcare	Testing	Testing supplies and staff facilitate adequate testing for disease control and surveillance	Green: 35+ tests are performed per day, on average, in the past two weeks Yellow: 24-34 tests are performed per day, on average, in the past two weeks Red: <24 tests are performed per day, on average, in the past two weeks	142.9
	Healthcare Infrastructure	Upland Hills Hospital is able to handle all cases without crisis care	Upland Hills Hospital answers no to all three of the following. Facility use status: The facility is damaged/unsafe or non-patient care areas are being used by the facility for patient care. Staffing status: Trained staff are unavailable or unable to adequately care for the volume of patients even with extension techniques. Critical supply status: Critical supplies are lacking, resulting in reallocation of life sustaining resources and/or other extreme operating conditions. Red: Yes to one or more	
	Regional Healthcare Infrastructure	Regional hospital bed use	Green: <80% bed use Yellow: between 80-90% bed use Red: Greater than 90% bed use	81.2%
Public health	Contact tracing and lab reporting timeliness	All positive cases are reported and contacted quickly to facilitate rapid isolation and quarantine for disease control	Green: Greater than 85% of all new cases are contacted within 48 hours of results becoming available Yellow: 70-85% of all new cases are contacted within 48 hours of results becoming available Red: Less than 70% of all new cases are contacted within 48 hours of results becoming available	96%
	Community spread	Community spread is identified and limited	Green: Fewer than 20% of cases in the past two weeks do not have a known route of transmission Red: 20+% of cases in the past two weeks do not have a known route of transmission	43%
	Health Department	Iowa County Health Department has adequate staffing to handle day to day operations.	Health Department answers yes to the following: Case Volume: Staff are able to manage health department operations. Staffing status: Staff are available to perform health department operations.	
	Isolation capacity	Capacity for supporting isolation and quarantine when appropriate	Green: Isolation and quarantine support resources are available Red: Isolation needs are not able to be met	
EM	Emergency management	Iowa County Emergency Management has adequate supplies and functional day to day operations	Green: Iowa County Emergency Management is in agreement that adequate pandemic-related supplies are available and day to day operations are routine or non-critical Red: Iowa County Emergency Management is lacking pandemic-related supplies or is attending to crises, disasters or other critical matters	

Iowa County COVID-19 Disease Control Metrics

What's new this week?

Epidemiology: Our percentage of positive cases remains yellow, now at 7.9%, a slight increase. The average cases reported daily metric had a slight change, now at 11.35, still in the red. The Outbreak metric remains red, still with fourteen active outbreaks in Iowa County.

Healthcare Status: Testing rate remains green with an average of 142.9 tests performed daily. We encourage anyone with symptoms to contact his/her health care provider to be tested. Our partners in health care remain in green status. We added an additional metric to provide a picture of our regional health care infrastructure. This metric represents regional hospital bed use and is currently yellow, as 81.2% of regional hospital beds are in use. In addition, 79.4% of total regional ICU beds are in use.

Public Health Status: Community spread had a slight increase, still in red, as 43% of cases are reporting no known source of transmission in the past two weeks. Our goal is that fewer than 20% of cases have no known source of transmission. This value is a reflection of current information, some data is missing, as not all cases have been in contact with the health department. Our contact tracing efforts remain successful, as 96% of positives cases in the past two weeks have been successfully contacted within 48 hours of their positive tests. This metric is dependent on individuals either answering the phone or returning our calls, which is becoming an issue. We've added an additional metric indicating the ability and availability of the health department to manage daily operations. With the continued increase in cases, this metric is yellow.

Emergency Management: Our emergency management partners remain in green status; however, PPE demand has picked up and the supply chain is experiencing issues with gloves, gowns and N95 masks.
